## PROFILE

I am a Junior Web Developer with strong skills in building websites. I love learning new things and working with technology. I'm excited to use my skills in real-world projects and keep improving by working with others. I enjoy solving problems and turning ideas into functional, user-friendly websites.

## PROJECT EXPERIENCE

### FullStack Project

Aug 2024 - Present

E-Commerce Website (*In progress*)

- Technologies Using: Laravel, MySQL, Tailwind CSS, JavaScript.
- Role: Junior Web Developer
  - Designing and developing a user-facing e-commerce platform with features such as product browsing, user accounts, and order management.
  - Creating an admin dashboard for product management, allowing administrators to add, edit, and delete products, manage product, and view orders.
  - Implementing back-end functionality using MySQL for handling products, inventory, and order data.
  - Developing secure user authentication and authorization systems to differentiate between users and admins.
  - Planning to integrate secure payment gateways ABA and VISA payway for seamless transactions.

### Backend Project

Jan 2024 - Feb 2024

University Management System

- Developed a comprehensive University Management System using PHP, MySQL.
- Implemented user authentication, student and teacher management, and student payment system.
- Optimized database queries for faster load times system performance.

### Frontend Project

Jun 2023 - July 2023

Portfolio Website

- Designed and developed a personal portfolio website to showcase web development projects.
- Utilized HTML, CSS(TailwindCSS), and JavaScript to create a responsive and visually appealing interface.
